

Engineered Plastic Components, Inc.

Environmental Policy Statement

EPC is committed to environmental stewardship and minimizing the impact of our operations. Through our Environmental Management System (EMS), we drive continuous improvement in environmental performance, in alignment with ISO 14001:2015.

Our Commitments:

- Protect the environment by preventing pollution, reducing waste, and conserving natural resources and biodiversity.
- Identify and comply with applicable environmental laws, regulations, and other obligations.
- Continually improve our EMS through regular reviews, audits, and management involvement.
- Set and pursue measurable environmental objectives based on risks, opportunities, and significant impacts.
- Allocate sufficient resources to support environmental goals and ensure employee awareness and participation.
- Reduce the environmental impact of our products, services, and operations wherever feasible.
- Engage with suppliers, contractors, and local communities to promote environmental responsibility.
- Ensure prompt incident response, investigation, and correction of non-conformities.

All EPC staff and subcontractors are responsible for supporting this policy and working in an environmentally responsible manner. Top management will review this policy annually and update it as necessary. The policy is available to interested parties upon request.
